Governance of Artifacts of Multi-Level Health Information Modeling Projects

The founders of the Multi-Level Health Information Modeling (MLHIM) project and all sub-projects have set these guidelines in place in order that all users and all potential contributors are aware of their rights and obligations concerning any artifact under the MLHIM umbrella[1]

Documentation

All documentation must carry any one of the six licenses as defined on the Creative Commons International website[2] as of 2010-07-01. Documentation is defined as any:

- Specification document, specification companion such as an enclosure, attachment or summary document.

- Software documentation

- Installation instructions

Notice: It is highly suggested to not use the Attribution Non-Commercial No Derivatives aka. cc by-nc-nd since this license does not provide for translations.

Source Code

All original source code in any language must use one of the licenses approved by The Open Source Initiative (OSI) in the category of "License that are popular and widely used or with strong communities" as found on the OSI website[3] as of 2010-07-01.

Original source code is defined as newly created programming language and textual comments in the file, by the contributing author.

All redistributed source code in any language must use one of the licenses approved by The Open Source Initiative (OSI) as found on the OSI website[4] as of 2010-07-01.

The contributor is responsible for insuring that all source code contributed to the MLHIM project is in compliance with the original author's license(s).

Knowledge Artifacts

Knowledge artifacts are defined as those components that are intended as constraint definitions against the MLHIM Reference Model. These will typically be but are not limited to:

---

[1] Defined at http://www.mlhim.org and further detailed at https://launchpad.net/mlhim

[2] http://creativecommons.org/about/licenses/

[3] http://www.opensource.org/licenses/category

[4] http://www.opensource.org/licenses/category

- Concept Constraint Definitions (CCDs)

- Template Constraint Definitions (TCDs)

All knowledge artifacts must carry any one of the six licenses as defined on the Creative Commons International website[5] as of 2010-07-01.

Notice: It is highly suggested to not use the Attribution Non-Commercial No Derivatives aka. cc by-nc-nd since this license does not provide for translations.

Website Content

All MLHIM umbrella project website content is licensed, with or without a specific notice on the content in question, under the Attribution Non-Commercial Share Alike aka. cc by-nc-sa Copyright for website content is shared among all MLHIM owners1. , whether or not they actually performed editing functions on the website in question.

Original Author's Rights

In all cases except website content, the original copyright resides with the original author or the original author's designee and at the author's discretion, any contributing authors.
